

PRESS RELEASE

This year, for the first time, Hungarian companies active in several fields related to medical technologies will exhibit and visit Santexpo with the support of the Hungarian Embassy in Paris.

EMD specialises in neurosurgery and laparoscopy and offers high-quality, internationally patented endoscopic solutions and equipment.

FF MEDICAL is a manufacturer of furniture for hospitals, outpatient clinics and medical practices. Based on German technology, their product families have won the reddot design awards several times.

PROXENON is a European manufacturer of high quality stainless steel accessories and equipment for sterilisation departments, operating rooms and endoscopy departments in hospitals.

ONCOTHERM is a specialist in oncothermy (modulated electro-hyperthermia for oncological use), a rapidly developing complementary treatment method for various types of tumours. The company is developing complete equipment that is already in operation in the UK, Germany and Spain.

Hungarian companies are looking for cooperation opportunities with partners in France. Interested partners and professionals are welcome at stand # U23 (opposite the Patients' Agora).
